

Town Council Gets Many Offers For Buildings

Also Have Proposition to Get More Road Work Done—Receive Petition Asking For More Convenient Jitney Service to Medicine Hat.

At the regular meeting of the town council held last Monday evening several applications for the purchase of town buildings, were received. A proposition for further street graveling was also put before the council, and council was petitioned to use its influence in having present jitney service, changed so as to provide, what was in the opinion of the petitioners, better accommodation.

Mr. Garner was present with a proposition to do grading and graveling on town streets in exchange for the old Redcliff livery barn building. Council set a price of \$300.00 on the barn. The matter of Mr. Garner's proposition was left in abeyance for investigation.

Mr. Framark of Hilda, wrote offering \$100.00 for a house in Lockwood. The offer was accepted.

Mr. Roy Schmidt was present and offered \$50.00 for house on lot 1, block 101, west of the Glass Plant Yard. The offer was accepted.

Dr. Ward was also present. He asked that council go half with him for expense of having woodwork of the town building now occupied by him, painted. The request was granted.

A. J. Osgood, wrote offering \$75.00 for house on Fourth St. R. N. Rose offered \$35.00 for old shed on Thirteenth St. These were left over till next meeting for investigation.

W. Nussey's offer of \$5.00 for the old blacksmith shop on Main street was accepted.

Mr. Campeau asked permission to cut a door between town's building which he is now occupying, and the store next door. This was allowed.

A petition from employees of the Dominion Glass plant asking council to appeal to give a ment to have some change made in present jitney service between here and Medicine Hat as schedule now in operation is not

Farmers Getting Coal From The River Bank

Are Coming Here From The Hilda and Irvine Districts

Last week about a dozen teams passed through town going west to the river where their owners, who are farmers from the Hilda and Irvine district were securing their winter's supply of coal. Last Monday another procession went through from the Irvine district for the same purpose.

It appears there is an old abandoned mine just west of town and the farmers just go and help themselves to the coal.

This may not be good for the miners and mine operators of the district but it surely is an easy and economical way of getting in a supply of coal for the winter, although it is at the expense of those who have considerable money invested in mine equipment.

As mining for coal is always more or less dangerous it would be advisable if the powers which gave permission to take this coal had some kind of supervision of the work as a safeguard against accidents.

The ladies of St. Mary's Church are serving a fowl supper on Thanksgiving Day. Look for their advertisement in this issue.

Mrs. Selthorn entertained delightfully at the tea hour on Tuesday afternoon. The guests being members of the teaching staff and Mrs. Stone.

The Ladies Aid of Gordon Memorial Church will hold their annual supper in the school hall on Wednesday, Sept. 27th. Supper will be served from 6:30 to 7 o'clock. Adults' tickets 70c; children 15c. A concert consisting of musical numbers, by local and Medicine Hat talent will be held on the same evening beginning at 8 o'clock in the auditorium. Everybody welcome.

satisfactory. On motion of councillors Broughton and Faville the secretary was instructed to inform petitioners that council had no jurisdiction in this matter and advising them to take the matter up with the provincial government.

Medicine Hat council asked for use of town fire hose wagon for their parade on the occasion of their golden jubilee. This was granted. The usual monthly accounts were read and approved for payment.

Redcliff Reminiscences

Taken From Our File of Sept. 18th, 1914

Word has just been received announcing the fact that A. B. Clow who has been visiting his old home in Scotland, has joined the army as a trooper in the Scottish home.

Owing to the financial stringency no new business was undertaken by council at their meeting on Monday.

At a meeting of representatives of the different churches and the town council, a central relief committee was organized to look after the needy in town this winter.

Paul Clemens, a German subject residing south of Irvine, was arrested on Thursday at 3 p.m.

The ladies of the town have decided to hold a tag day on Tuesday. One-third of the proceeds will be sent to the Red Cross Society to be used for the relief of wounded soldiers, and two-thirds to the relief committee to be used for the relief of the needy in town.

A second glass plant is to be built here this fall. It will manufacture plate and other window glass. It will be the first of its kind in Canada and will employ between seventy-five and one hundred men.

JUST FOR FUN

There's a short-stop whose first name is "Short." She can Skidmore in "longer" than a skirt. She can punt out the ball, Just like nothing at all, And can slide into home in the dirt.

There were just as many rattle driven years ago, but the horses had more sense.

Crooning was defined by Noah Webster, who preceded Ralph, to be a continuous hollow sound as of cattle in pain.

A lady is a woman who always remembers others, and who forgets herself.—Chas. Hanna Gibson.

All work and no play makes Jack—and lots of it.

Modern child, stroking his new kitten: "Mummy, it's left its mother running."

A pedestrian is a man whose home is home from college.

Flirtation is paying attention without intention.

Mike Sumack, who was injured in the coal mine some time ago, is at present in Calgary undergoing treatment under the direction of the compensation board.

CARD OF THANKS

As I am disposing of my child in business I wish to thank my many customers for their patronage during the last seven years.

Grain Man Lauds Bennett's Wheat Quota Plans

"The Bennett quota agreement is the finest agreement made by any Federal Government internationally in many years," a prominent grain man declared in Winnipeg recently.

This man is so close to the grain trade the banks, the pools and the farmers that he would not let his name be used. But he is one of the three biggest grain men in Canada.

"Who," he asked, "but Premier Bennett would have stuck to his guns for twelve whole months and wrestled—literally wrestled—this agreement from the coldly-conflicting interests of antagonistic import and export countries?"

"It marks the dawn of a new era in world marketing—plan of co-operation. The exporting countries, with a billion bushels of wheat to sell in a market that can absorb only 500 million, have agreed not to fight in price but to accept quotas on a just basis.

The importing countries, with a promise that the exporting countries will not dump grain and so ruin domestic agriculture there, hail the agreement as a soundly-based economic effort to save their own agriculture from being dragged down to ruin.

Miss Jean Paterson has returned from a vacation in Calgary.

A general meeting of bairmington enthusiasts was held last evening in the parish hall, for the purpose of organizing for the fall and winter months.

Mr. Chas. Miller, of Peace River, was a visitor in town last Friday. He was the guest of his uncle, Mr. B. Hurlbert and Mrs. Hurlbert.

First Crossing Of Atlantic By A Vessel Using Steam Was Made A Hundred Years Ago

This year marks the centenary of the first crossing of the Atlantic Ocean by a vessel using steam. On the way, the historic voyage was made by a Canadian-built wooden paddle-steamer, the "Royal William". To commemorate the occasion, the Canadian Post Office Department is issuing a special postage stamp.

The "Royal William," built at Quebec, was launched in April 1837, and towed to Montreal by two tug-boats. Her engines developed 200 horse-power. Her cost when ready for sea was \$75,000. Her dimensions were length over all 178 feet; depth of hold 18 feet; breadth over paddle-boxes, 44 feet; the vessel was originally intended to be used between Montreal and Quebec and Nova Scotia, and the enterprise of building her was carried out by a group of Quebec and Montreal merchants, assisted by a grant of \$15,000 from the Government of Lower Canada. Among the shareholders appear the names of three Cunard brothers, one of whom later founded the present Cunard Line.

After three moderately successful voyages in 1837 to Halifax and intermediate ports she laid up for the winter. In 1837, owing to a cholera epidemic, she made only one voyage, and her owners became bankrupt.

In the spring of 1838 a new company was formed, which purchased the vessel and, for a time, used her for towing and local excursions. Then in June, 1838, she sailed on a trip to Boston, where she was enthusiastically received as being the first steamship flying the Union Jack to enter a United States port.

On her return to Quebec her owners decided to send her to England for sale. It was on this voyage that she made history, demonstrating to the world the feasibility of navigating the oceans by means of steam-propelled vessels, notwithstanding the declaration of critics that they might as well talk of making a voyage from Quebec to the moon.

Early in August, 1838, left Quebec for Pictou, in the Northumberland Strait, where she remained a few days coaling, and then proceeded to England, and awaiting passengers. Eventually, on August 17th, she steamed out of Pictou Harbour for England. Her clearance papers stated she was a vessel of 363 tons bound for London, that among the goods carried were 254 tons of coal (648 tons), a consignment of ship's stores, a box of stuffed birds, one harp, one box, one trunk, household furniture and seven passengers. One British: Her master was John McDougall. During the voyage the standard engine was disabled and the vessel sprang a leak. After 25 eventful days and nights the "Royal William" arrived at Gravesend. Ten days later the vessel was sold to the Canadian Government as a trophy. Captain McDougall retained command of the ship, and she was successfully offered for sale to the Portuguese.

In 1838 the ship was bought by the Spaniards, sent to Gravesend to be converted into a "war-steamer," and renamed the "Isabel Segunda." Later she returned to the Spanish coast, and on May 5, 1838, in the Bay of San Sebastian, she earned the distinction of being the first steamer of war to fire a hostile shot. In 1840 she was sent to Bordeaux for repairs but was converted into a bulk carrier. Her engines were transferred to new ship of the same name, which ultimately sank off the Algerian coast during a violent storm in 1869.

And so, with her hull rotted in Bordeaux harbour, and her engines lying at the bottom of the Mediterranean Sea, the "Royal William" ended her distinguished and varied career.

A memorial tablet in the Canadian House of Commons commemorates the first trans-Atlantic voyage by the "Royal William."

The Friendly Border
Pat Campbell made the 500-mile trip from the Pra to Winnipeg with his dog out on the way. Fair and on reaching the border found that he would have to put up \$200 and \$2 for each dog entering the land of the free. Once again, says the Stratford Beacon-Herald, that is the same friendly international border about which orators speak at banquets.

Franco is testing out a new type of vest pocket watch.

One Of London's Mysteries

No One Knows Why City's Smallest House Was Built

London's smallest house is now for sale. Situated between two tall mansions in Hyde Park Place, it is only six feet wide and just twenty feet long. It consists of a tiny entrance hall and only seven rooms on the ground floor and two more rooms above. Joining them is a narrow iron ladder, which a fat man could not possibly ascend.

Still it is a real house with a number and a letter box, but no knocker or bell. No one has lived in it for some time, though it has occasionally been used as a servant's bed room by the owners of the house next door.

How such a tiny place came to be built is one of London's little mysteries. It is said that about 60 years ago a certain Miss Jobb, who lived next door, had it built for her maid when she retired. It is further alleged that miniature furniture was made to fit it. It is thought that Harrie had the little house in mind when he described the home of Mr. and Mrs. Darling in "Little White Bird," London Correspondent.

Trade Within Empire

Canada's Trade Shows Increasing Exports To Empire Countries

All British Empire countries, but the British West Indies, imported more goods from Canada during the first four months of the current fiscal year than for the corresponding period a year ago, according to figures issued by the Dominion Bureau of Statistics.

Australia's imports from Canada rose from \$2,008,263 to \$3,153,054 or 58 per cent, while those of the United Kingdom increased 34.8 per cent, from \$4,607,911 to \$6,227,280. Imports of Canadian goods into British India rose 25.9 per cent to \$89,146 and to South Africa 16.6 per cent, to \$1,238,152. New Zealand's imports were up by 2.5 per cent to \$1,065,533 and those of Newfoundland 1.1 per cent, to \$1,823,864.

Cougars Menace Ranchers

Residents Of West Coast Of Vancouver Island Live In Dread

Residents of Port Alberni, on the west coast of Vancouver Island, walk the streets armed with shotguns and rifles to protect themselves and their property against marauding cougars that descend almost daily on the town.

Having exterminated the deer and furbearing animals in the district between Port Alice and Cape Scott, the cougars invade the yards and corrals of settlers and steal poultry, pigs and hens, practically all the dogs have fallen prey to them.

This information was brought by Rev. William Gravier, of Port Alice. "Unless drastic action is taken soon many of the ranchers will be forced to abandon their ranches," Mr. Gravier said.

More Farms In Canada

Increase Has Been Only In Four Western Provinces

During the last two decades there has been an increase of 46,325 farms in Canada. In the five eastern provinces there was a total decrease of 61,703 farms, while there was an increase of 97,997 farms in the four western provinces. A gradual shifting from land ownership toward tenantry is taking place in all provinces except in Quebec where there is a slight increase in land ownership. This shifting in tenantry is particularly noticeable in western provinces.

Standard Bushel

Unless a bushel by measure is specially agreed upon, it must weigh the following number of Standard Canadian pounds: Clover seed, bean, wheat and peas, 60; Indian corn, 56; soy, split, beans, timothy seed, 44; hempseed, 44; castor beans, 40; malt, 36; oats, 34, and blue grass 14 pounds.

Or course Canada has a future. They're selling 1934 calendars now.

Canada's Fruit Crop

Apples Will Be Fourth Best Outcome

The Dominion Department of Agriculture estimates the 1933 crops of pears, peaches, grapes and plums will be lower than last year, but that apples will be more plentiful. In a survey published recently, the department placed an estimate of 4,438,000 barrels on the Canadian apple crop, compared with 5,077,000 barrels last year.

Canada's pear crop this year was estimated at 424,000 bushels, compared with 460,000 bushels last year. The peach crop was placed at 81,000 bushels, a drop of 91,000 bushels from 1932. The plum crop was estimated at 22,000 bushels, only 79 per cent of last year's total. Due to failure in Ontario, the commercial grape crop was estimated at 45,668,000 pounds compared with 54,100,000 pounds last year.

Wheat Situation Is Discussed At Round Table Conference Of Pacific Relations Institute

Unidirectional To The Last

Bucking Horse Motives From Redneck

Midnight, widest of western stamper horses, has made his last appearance before a rodeo audience, a fading the final curtain call in a cloud of dust at the Cheyenne roundup on the other day. He will be retired to the green pastures.

"Midnight," perhaps the greatest bucking horse ever known to the rodeo world, plunged out of the Cheyenne arena chute and, reaching for the sky with his front feet, head down and hind feet pointed ten feet above the ground, sent Turk Greenough of Red Lodge, Montana, 1933 Cheyenne roundup champion, rider flying. Greenough stuck to "Midnight," black back only two and a half seconds. The performance climaxed the big show and the Cheyenne rodeo was given a great lead by the crowd in the grandstand. He was unriden to the last.

Midnight, "Midnight" was once a docile, sturdy cow pony of the Alberta foothills. One day a tumbleweed blew under his belly and sent him on his first bucking spree and on to fame! For a decade he has furnished thrills to rodeo crowds from Calgary to Tucson and now at seventeen years of age he will be taken away forever from the arena by his owners, Verna Elliott and Eddie McCarty. They are retiring him to their ranch in the foothills.

The celebrated bucking horse easily ousted the famous mascot mount. He is more powerful, bigger, faster. He has the weight of a truck horse and the speed of a mustang. He goes and when released from chute but otherwise is kind and docile. "Born to buck," that animal, said an old-time cowboy recently. And that about sums it up.

Live High Above World

Home Of Forest Reserve Guardian

1,130 Feet Above Sea Level

Fenced on a narrow patch of crumbled rock, 1,130 feet above sea level, where he lives all summer as one of the provincial gamekeepers. Rev. River forest reserve guardians. Arthur Shantz told a reporter that "it'd be all right if I could keep the deer from coming in here. The deer would give me enough paint to cover the cabin."

Those were the only complaints about a job which keeps him high above the world, sometimes for more than a month without seeing another human being. His domain is only 30 feet wide by 30 feet long.

The lumber for the shack occupied by Shantz, who likes to call himself "Old Man of the Mountains," was hauled up the mountain by hand at considerable risk and expense.

Relic Of Bronze Age

Interesting Discovery Made Near Oxford, England

Burials which took place 4,000 years ago are being unearthed near the village of Cassington, a few miles from Oxford, where a by-pass road is being constructed to divert traffic from the university city.

Seven skeletons, in the "crouched" position, which denotes that their burial took place in the bronze age, have already come to light. A notable feature in each case was that the bodies had been buried facing the setting sun.

Saskatchewan Butter Output

Production Of Creamery Butter For Summer

Butter from the New Zealand government creamery, which is being produced in the province of Canterbury, has been placed with present position within the British Empire and will not become an "Independent" foreign state.

Curfew For Parents

Windsor, Ontario, will again strictly enforce a curfew law which prohibits the children under the age of sixteen shall be in their homes by 10 p.m. The next arrangement should be for one of the parents to be home to ensure their presence.

Put To Rest - One

In a curio exhibition held in connection with a village flower show at Goodenham, Suffolk, the other day the second prize was awarded for a walking stick made from the paper of 5,000 love letters.

The Beauty of the House is Order

The beauty of the house is order; the blessing of the house is contentment; the glory of the house is hospitality; the crown of the house is solitude.

Discussion of the wheat situation and its effect upon international relations marked a significant achievement of the Institute of Pacific Relations.

A Canadian delegate opened the discussion with an authoritative account of developments in Canadian wheat since 1927, the emergence of a serious grain market, wheat taken to crops with its impact of foreign tariff upon Canada's export trade, and negotiations at Home and elsewhere for coping with the situation.

Under present conditions the member said, the view is impracticable that the wheat growing industry of Western Canada may be described as bankrupt, and its plight is being aggravated by the chaotic condition of wheat markets. He thought, however, there is considerable hope of advantage to the wheat grower in some international agreement between the major wheat exporting countries whereby they would agree to establish themselves a quota system for exports and to control deliveries. He believes such a scheme was feasible, and would not only help to stabilize the market, but would, in a few years, result in a curtailment of acreage because farmers would not continue to grow wheat which they could not market.

If an export quota system were introduced it would be necessary to establish a wheat board, but would, in a few years, result in a curtailment of acreage because farmers would not continue to grow wheat which they could not market.

It was agreed if the process of industrialization in Japan also will be bound to seek food supplies in the cheapest market and will probably increase her import of wheat. A delegate from the Dutch East Indies declared the tendency of Java to import wheat is increasing. Exports of the wheat market available in China is problematical, it was indicated, as many Chinese do not consider wheat a staple food. It is of local food, and there is also an increase of local wheat production.

U.S. Citizen Appointed

Hen. Newton Baker Selected Chairman Of Pacific Relations Institute

Hen. Newton D. Baker, secretary of war in the Wilson administration of United States, has been appointed chairman of the Pacific Relations Institute of Pacific Relations, successor of Jerome D. Greene, Wilson president at the University College of Wales.

The appointment of Baker, who had been conferred on him, Mr. Baker told a general meeting of conference members most of the trouble in the world came from misunderstanding and, therefore, the institute had a high duty in searching out and spreading knowledge in order to lay a basis for understanding, through appreciating, in a hopeful and scientific manner, the causes of international problems which had come to be the world's chief preoccupation and concern.

Remain Within Empire

New Zealand Will Not Become An Independent Sovereign State

Up to the present New Zealand has shown no steps to adopt the status of Westminster, according to a paper presented at the 10th annual convention of the Institute of Pacific Relations by W. A. Curzon-Siggers, lecturer in public international law at the University of Oxford.

According to Mr. Curzon-Siggers it is doubtful if New Zealand government will proceed to alter the status of Westminster which gives greater independence to the Dominion. New Zealand is a subject of the British Empire and will not become an "Independent" foreign state.

Curfew For Parents

Windsor, Ontario, will again strictly enforce a curfew law which prohibits the children under the age of sixteen shall be in their homes by 10 p.m. The next arrangement should be for one of the parents to be home to ensure their presence.

Put To Rest - One

In a curio exhibition held in connection with a village flower show at Goodenham, Suffolk, the other day the second prize was awarded for a walking stick made from the paper of 5,000 love letters.

The Beauty of the House is Order

The beauty of the house is order; the blessing of the house is contentment; the glory of the house is hospitality; the crown of the house is solitude.

May Have Trip To Canada

Mr. and Mrs. C. W. Lawrence, who have looked after the conduct of Canadian Blat teams in the Canadian Blat at the great empire rifle meetings at Hilden, England, for the past three years, will be given a holiday trip to Canada if plans of Canadian marksmen materialize.

Famous "Ball-Dog" Ant

Professor States Primitive Australian Insects Are Vigorous Creatures

The only formidable "animal" in the Australian bush are poisonous snakes and the famous "ball dog" ants," according to Dr. William Mott Wheeler, professor of entomology at Harvard University.

The "poisoners" or primitive ants of Australia sometimes reach more than an inch in length, are "angularly" alert, wasp-like, jagged, long-jawed and fiercely stinging creatures. The larger species live in mound nests which may be from 1 to 8 feet in diameter and the population of a colony may be from 150 to 200 individuals," said Dr. Wheeler.

Russians Cannot Own Dogs

Must Be Killed For Skins To Cloth Soviet Army

In a short while there will be no dogs in Russia. A new decree orders all owners of dogs to deliver their animals immediately to special dog kennels. The animals will be killed and their skins sent to Government fur factories to be converted into clothing for the Soviet Army. It is expected that 3,000,000 skins will be obtained in this manner, sufficient for the army's requirements.

New Industry In Canada

Montreal Factory Producing Nicotine Sulphate In Commercial

Nicotine sulphate is now being produced in Montreal in commercial quantity, according to the Market Division of the Dominion Bureau of Statistics. The plant is designed to manufacture in sufficient volume to supply some export business as well as free nicotine is another product of the same plant. All the tobacco as well as the chemicals used in the new industry are of Canadian origin.

The low grade waste tobacco from the Ontario and Quebec crop serves as the raw material. The nicotine sulphate manufactured therefrom is of standard 10 per cent strength and its appearance and volatility is equal or superior to the best imported from other countries.

Here and There

Taken as a whole the British West Indies as a market for Canadian products ranked tenth last July with \$150,000, with Newfoundland coming next.

Increasing prosperity in Canada and the United States is seen in the early arrival in the Dominion of United States Christmas tree buyers. They are particularly busy in the Maritimes where the demand is especially heavy.

Edward C. Carter, of New York, traveller and publicist, has been chosen to fill the newly-created post of secretary-general of the Institute of Pacific Relations which has just completed its fifth annual conference at the Banff Springs Hotel.

Eleven happy boys took the eleventh annual "On to Alaska" tour this week under the leadership of George R. Buchanan, of Detroit. Their trip included a stop at the Banff Springs Hotel where the boys stayed until they returned for Lake Louise.

Traffic earnings of the Canadian railways for July show an aggregate gain of nearly a million dollars as compared with July, 1932, the best showing in many months on similar comparisons. Gross earnings of the Canadian Pacific account for \$477,000 of this gain during the month.

"He got you that time," said Mrs. Montague Norman to the governor of the Bank of Montreal, when they landed recently at Quebec from Canadian Pacific liner, Duchess of Athol, on their way to Star Harbor, Maine. The purpose of the visit is a mystery, not even a holiday being admitted by the distinguished visitor.

John Nelson, president of Rotary International, called recently by Empress of Britain on his way to Louisiana where the second European regional conference of the world-wide organization was held this month. He stated that Rotary had 150,000 members in 500 clubs.

"It is from the conferences, speeches and exhibitions at the World's Grain Exhibition in Regina we can derive even one suggestion of importance to agriculturists, the show will be noted as a success," said R. H. McHenry, manager, United Grain Growers office in Calgary, in a recent address at the Puller Hotel in that city.

Security and Protection

Grain growers, the length and breadth of Alberta, should keep in mind that a fair measure of protection and security in the sale and handling of their grain can be obtained through the building up of a strong elevator system on a strictly grower-controlled, co-operative basis. Having this in mind the best course to follow is to

Feeling Business Recovery

Lumber Operators Preparing For Big Cut Next Season

Signs of business recovery are evident in Canada's northern, according to Dr. J. B. Phillips, Department of Chemistry, McGill University, who has just returned to the university after spending some three weeks in a wild area west of the upper reaches of the Ottawa River. Dr. Phillips combined business with pleasure. Travelling some 300 miles by canoe, with Lorne MacLaren, of Buckingham, Que., he secured a number of samples of promising copper ore from a district that heretofore has been shunned by geologists.

Tests here are to be followed by a second trip into the northland before the opening of the university session. There are indications that gold and silver will also be found in the new copper area district.

Everywhere they went there was talk of recovery and better times. Dr. Phillips said. Experienced lumberjacks, who have been eking out a bare existence by trapping during the last winter or two are getting ready to join in the recovery movement.

Lumber operators are sending their men into the bush getting ready for a big cut next season.

Camping the first night a short distance from the car, the two were awakened at midnight by a curious signal of the automobile horn.

Grabbing up their flashlights, they rushed toward the car to chase away the marauder and found a porcupine sitting on the steering wheel.

The porcupine had his forefeet firmly on the front button and refused to budge. They played their flashlights on his eyes until he turned tail and ambled out of the car.

Mountain Climbing Fatalities

Four British School Masters Lose Lives in Switzerland

Word was received at Eton College recently that four of the English masters had been killed while mountain climbing accident in Switzerland.

Bodies of the men, who left England several days ago for a holiday, were reported found at the foot of a steep wall of rock on Rong Peak in the Bernese Alps. The victims were H. B. Horwood, E. V. Slater, E. W. Powell, all housemasters, and C. R. W. Thomas, assistant master, and eldest son of the Bishop of Ely. Powell, widely known as an orn, was an old Oxford blues and winner of the Diamond Sculls of Henley in 1912.

History May Be Repeated

Cattle Killed Hudson's Bay Route

Re-opening of shipping activities in this Hudson's Bay port and the move to establish it as an ocean outlet for shipping shipments to the west. The Kingdom recalls the fact that 200 years ago, a cattle shipment arrived at Churchill from England. The first "Mary," which sailed from England on August 8, 1733, brought two oxen and two bulls. They were sent to land about 10 miles from the Port of Prince of Wales. Ruins of this now historic fort are still to be seen at the harbor entrance. It took years to build the structure, considered one of the strongest on the North American continent.

Taking No Chances

Two jokers visiting a big city saw a double-decked bus for the first time. Boarding it both went inside, and one of them lit a cigarette.

The conductor politely told him to get up if he wanted to smoke, so he went.

A couple of minutes elapsed. Suddenly he came rushing down stairs and sat down beside his seat, who asked him what was wrong. He said: "It's no safe upstairs—there's no driver up here."

Had Good Reason

Book borrowers who forget to return the loan are seldom so honest as a former student of St. Andrew's University, Scotland, who borrowed a copy of Plato's "Republic" thirty years ago. He has just returned it with the apologetic explanation that though he has kept it so long he has been too busy to finish reading it.

Veteran Water Diver

Although he will be 50 in a few days, Joseph Wrightworth is journeying into the books hills to find a water diver for a client. He has many times demonstrated his skill as a water-diver. He has been in British Columbia since 1862, when he arrived from England, and took part in the Cariboo gold rush.

Canadian Insurance Companies Are Sound

Have Come Through Lean Years

At a time when doubt is being cast in many directions as to the soundness of financial institutions, and when many are inclined to distrust the insurance companies, have come through the lean years with flying colors, particularly so because the people of Canada rank as the second best insured people in the world and today sixty-seven per cent. of Canadian insurance is with Canadian companies.

With the enormous sum of \$1,750,000,000 of accumulated premiums, Canadian insurance companies are playing an important and increasingly large part in the upbuilding of the Dominion through financing all sorts of industrial, commercial and Government undertakings. That there have been losses in the course of the present year is true. But they have been such as are met with in any ordinary carefully conducted business.

And it speaks volumes for the Canadian insurance companies as a body that never since they first began operations in this country has any Canadian policy holder lost a dollar through the failure of any company holding a Dominion license.

—Montreal Star.

A Cave Of Champagne

Thousands Of Cases Rept Beneath "White Cliffs Of Dover"

It is not generally known that beneath the "White Cliffs of Dover" is often celebrated in poem and song, is a grim cave which contains many thousands of cases of champagne.

The walls and roof are carved by the picks of French prisoners who were forced to build the cave during the war.

After the war was over, the cave became the peaceful dwelling of the barracks from a brewery. Then the place was used as a store, and during the World War cases of stock and munitions lay side by side.

Today the champagne that substantially holds on the tables of the city of London lives happily in the stacks in the cave. Every night the champagne ships' leave Calais for France to replenish the stock, which is guarded by a solitary watchman in a sea-guard's jersey. And in the morning a horse and cart appear, laden with cases stamped and examined by the customs, and a fresh consignment takes its place among the others.

Some of which have lain in the cave since the war.—London Correspondent.

Want Representation

Western Indians Would Have Voice At St. Catharines Conference

Chief Hector McLean, Indian graduate of the University of Manitoba, petitioned Sir Herbert Samuel, the representative of the Canadian government, at the conference of the Institute of Pacific Relations. He believed he spoke also for the other Indian tribes of Canada.

Chief McLean said the Indians wished to submit certain matters of interest sociologically to the conference to the end they might be taken up by the Dominion and British Governments.

Sir Herbert replied he was sorry he could not act in the premises but, as this was strictly an internal affair, it did not fall within the scope of the institute's activities.

Only Reason She Knew

A young narrator, in a harrowing cross-examination of a landlady, was trying to discredit her boarding house on the eyes of the jury.

She spoke of certain lodgers who never went out at night, and the narrator pointed upon her at once. "A queer set of people seem to live in your house, madam," he said. "Is there some reason for their hiding themselves from the public?"

"They're studying for the law," replied the landlady.

Biggest Broadcasting Studio

Radio broadcasts are to be shown to the public in London. This is the biggest broadcasting studio in the world is being erected. The whole of the National City, at Olympia, is being converted into a studio with seating accommodation for 2,000.

According to estimates the sun and its planets are losing 130 million a second in the direction of the southern constellation of Dorado, the Dragon.

BLUM CHILDREN'S "SEASIDE" IN SHADOW OF HOUSES OF PARLIAMENT

The sand-pit in the Victoria Tower Gardens adjoining Lambeth Bridge, is a favorite resort for youngsters from the poorer districts of Westminster and Lambeth.

Increased Car Loadings

Grain and Grain Products Help To Increase The Total

The upswing in cars loaded on Canadian railways, which began at the beginning of the present month has continued, and for the week ending August 12, the figure exceeded by 869 the number of cars loaded for the corresponding week of last year. There were 37,775 for the week ending August 5, and 38,644 for last week.

Grain and grain products increased by 1,049 cars, from 4,706 to 5,756. While coal loadings were up by 484, pulpwood, ore and miscellaneous freight increased, while livestock rose by 347 cars.

Commodities with decreased loadings compared with the week ended August 5, were: coke, lumber, pulp and paper, and other forest products.

Third Of Road Built

Work To Continue On Lake Louise Scenic Highway

Over 50 miles or one-third of the Jasper-Lake Louise scenic highway has been built while relief work will be continued on the road throughout the 1933 season, according to Hon. Thomas G. Murray, federal minister of interior.

It is proposed to resume work on the Jasper Highway west to the Banff-Jasper Highway. The latter road is now being completed to the west end of the road to the Little Hot Springs.

Ferred Trip Possible

Two young medical students who risked their lives to prove they could paddle a 72-foot canoe from Nahkiss, Ont., down the treacherous Drowning, Kenogami and Albany Rivers to James Bay, and then make their way down the western coast to Moosemen, completed the trip.

Employment has been increasing in Hungary recently.

World's Quietest Place

Room In Holland Specially Built For Scientific Research

The quietest place in the world is not the summit of a high mountain or a distant place in the middle of the ocean, of an isolated spot in the desert.

It is in the heart of the city of Utrecht in Holland. In this quiet place is a room for scientific research, specially built to avoid all vibration.

Professor H. Zwaardemaker, a well-known Dutch physicist and physiologist, had built it.

Professor Zwaardemaker built three rooms, one inside the other; thus, since a vacuum is a poor conductor of sound, he had the air pumped from between the walls. The interior walls of the rooms were covered with six layers of material; one layer was of stone blocks, treated by a special process. The cavities between the stones were filled with borax; next to the stone were placed layers of wood and cork. The other coverings were layers of lead plate, sea glass and paper.

The walls were further lined with lead, to absorb the linear sound waves. Not the slightest sound can penetrate to the innermost chamber.

Aid Prisoners To Escape

Secret Organization Said To Assist Escape From Devil's Island

British Guiana police are convinced that a secret organization in Cayenne assists prisoners to escape from Devil's Island and other French penal colonies in French Guiana. It is held that branches of the society exist in Trinidad and Venezuela to help convicts reach Colombia.

More than 30 fugitives from Cayenne have passed through British Guiana this year after braving the terrors of the jungle and sea. Forty escaped by way of British Guiana in 1932.

Forecasting The Outbreak

Outbreak Is Expected In Western Localities Next Spring

A warning has been issued by the Entomological Branch, Dominion Department of Agriculture, that the conditions this spring in certain areas of Saskatchewan and Alberta, west of a line drawn north and south through Regina, have been such that a more extensive outbreak of the pale western cutworm may be expected next year. The adult of the pale western cutworm is a grayish moth which begins to fly and lay its eggs from the first of August to the fifteenth of September during that time any and that is being cultivated, pastured, harvested, or distributed in any way, is likely to receive eggs and be infested next spring. It is the opinion of the Entomological Branch that, since the eggs are laid only on leaves and, any field being summer-fallowed should be kept free from weeds and then left entirely undisturbed until after September 15th. It is also urged that land which is harvested between August 1 and September 15 be not seeded next spring until it is known definitely that no cutworms are present.

Canada's Newest Seaport

Traffic Out Of Churchill Expected To Be Double Of What It Was Last Year

Traffic out of Churchill, Canada's two-year-old seaport on Hudson Bay, is expected this year to be double what it was last year. More than 5,000,000 bushels of wheat will be loaded by 20 ships before the middle of October, compared with 2,738,000 bushels of wheat last year.

The first ship to dock at Churchill this year was the "Pennyworth," which left Glasgow, Scotland, on July 13. She brought 4,000,000 pounds of freight, which will be carried from Churchill over the Hudson Bay Railway.

The first ship to leave Churchill this year was the "Pennyworth," which left Glasgow, Scotland, on July 13. She brought 4,000,000 pounds of freight, which will be carried from Churchill over the Hudson Bay Railway.

The port of Churchill has every modern facility for the handling of ships and the loading and unloading of cargoes.

An Archaeological Find

Butler 5,700 Years Ago Discovered In Egypt

Hazelnut butter 2,700 years old and still in good condition was the archaeological find recently examined by Professor Dr. Johannes Cruss of Berlin-Rahmstadt.

The material, as described by Professor Cruss, consisted of two lumps about the size of plums, found with the remains of a man of the Iron Age, about 500 B.C. in a grave near the ruins of Butling. The body had been cremated before burial, and the urn containing the hazelnut butter was the fire. The thoroughly sealed earthen vessel and its sealed-in contents, coating the fat with a condensed layer that contained a second protective covering. Consequently in all the centuries bacteria and fungi had been unable to penetrate to the fat and spoil it. It was identified as hazelnut fat by analysis of carbonized nutshell embedded in it.

Lost A Hand

Premier Ministerial Help To Pull Cannon Up A Hill

Premier Ministerial help—a sturdy hand to assist in pulling a cannon up a hill during the recent army manoeuvres in Italy.

He arrived by automobile while the artillerymen were struggling to drag a gun into position.

"I'll give you a hand, too," the premier said. He tugged stoutly while a sergeant shouted, "March on!" and the gun sped up the hill. The artillerymen cheered him.

Oris Of India Modern

Hindu women of the middle class have won their right for the right to work freely in public. The modern Indian girl may now powder her face wear her hair in curls, or have a permanent wave, look frequently in a mirror and require a broad safety streak on the forehead by a small circular mark.

Unique Bookstore In Japan

The most unique bookstore of Japan, kind in the world is located in Japan. It makes the book that every single book published—no fiction as well as fiction, is available within two months of publication and kept in stock thereafter. What a country!

Dreaded Sleeping Sickness

Disease Is Said To Be Ragging Spreading

Sleeping sickness is one of the world's growing diseases. It is said to be spreading in the two or three hundred years. It is only since the Great War that this fatal malady has been reported of world-wide occurrence. Little of it was known in the United States, until after the "flu" epidemic which swept this country in wartime 1918.

The cause is a specific virus, which has escaped isolation and identification. The virus is invisible even under microscope. Its effects are similar somewhat to those of infantile paralysis. Like the paralytic the sleeping sickness virus attacks or has a special affinity for the central nervous system. Paralysis and the sleeping sickness, however, attack different areas.

In one form which produces progressive lethargy and stupor the virus attacks the brain. In the other form of cranial nerve. This pair is one of the large nerve channels. It controls the movement of the eyes. The sleepiness which gives the disease its popular name does not, however, come from the fact that these eyes never open. The disease is induced by general brain involvement.

The direct effect of the virus upon the eye motor nerve is distortion of vision. The distortion is the "ophthalmoplegia," which is one of the names of the disease. Dr. Milton J. Rosenow, chief of authorities on sleeping sickness, says that this ophthalmoplegia occurs in about 76 per cent. of the cases.

According to Dr. Rosenow, the mortality is high, the "incidence" of the disease low, but this incidence is on a course of political action which has no other infection is so irregular and has so many different forms.

Refuge For Jews

Says Palestine Should Be Made Jewish Home

The 15th World Zionist Congress, Dr. Selig Brodetsky of Great Britain, told the gathering, "must decide upon a course of political action which will make the nations of the world learn the truth about the situation of the Jewish people, and about Palestine," as their duty.

"Above all," he declared, "Great Britain must learn this. We must stand with the other great nations and appeal to the League of Nations, which represents the concentration of the conscience of humanity."

Previously the speaker said Palestine should be made available to "tens of thousands of German Jews" who are being persecuted by the action of Chancellor Adolf Hitler.

A warm reception was given Premier Albert Einstein when he arrived to attend the Congress.

No Longer Tedious Trip

Toronto Can Be Reached From Vancouver In 37 Hours

Vancouver to Toronto in 37 hours is the new record made by a train of the year now, Mrs. B. Flaherty, buyer for a coat firm, has discovered. Leaving Vancouver at 4 p.m. on a recent Wednesday, she took liner of the United Airways at 9 p.m. arriving in Chicago at 1 p.m. Thursday. Then, after three hours' shopping she took the night train for Toronto, arriving 8:30 Friday morning, having spent 37 hours in travel. Her destination been New York City, the entire trip would have taken only 39 hours.

Thousands Of Night Workers

New York has 400,000 men and women who sleep by day and work by night. That the rest of New Yorkers are not so busy is made apparent by the fact that many of them sleep in bed, read newspapers and perhaps also certain letters under the clock before beginning a day's work. They sleep in hushed homes with shades down and are busiest when most others are dead to the world.

Should Help Business

The biggest department store in Cairo, Egypt, draws a number monthly from 10 to 30 or 35 (excluding Sundays and holidays) and any customer who bought anything in the store on the lucky day drew, gets 10 per cent. refund.

No Heading In Bed

King George, while inspecting a bedroom at the advertising exhibition at Olympia recently, on observing a reading lamp, remarked: "When I get to bed I go to sleep, I have not read in bed for 40 years and I am not going to start now."

Brain has appropriated large areas to aid its drouth sufferer.
